### HOBBIES

Programming (Arduino, App Development)  
Exploring & learning computer science skills  
Composing music (mostly MIDI)

### PROFILE

I am a highly motivated and self-disciplined programmer with a keen interest in advancing my skills in the intersection of business and IT. As a responsible and enthusiastic individual, I tackle challenges head-on with determination. With two years of global experience as a front-end developer in Malaysia, I have honed my skills and developed a deep understanding of the IT landscape. Now, I am eager to leverage my expertise to contribute meaningfully to society through my knowledge of IT.

### EDUCATION

- Hibiscus International School (1st to 8th grade) | 2011 - 2018 | Malaysia
- Semesta Bilingual Boarding School (9th - 12th grade) | 2018-2022 | Indonesia

### WORK EXPERIENCE

Stampede Design

Intern

March 2021 - April 2022

- Developed web and mobile applications tailored to client requirements, utilizing Angular (HTML, CSS, Typescript) & Ionic framework technologies.
- Utilized version control systems like Git (through Github Desktop & Sourcetree to manage and track changes to the codebase, collaborating effectively with team members on project development.
- Collaborated with backend developers to seamlessly integrate front-end code with server-side logic and databases, ensuring robust and efficient application functionality.

Front-End Developer

April 2022 - Present

- Collaborated closely with UI/UX designers to translate design concepts into functional user interfaces, ensuring seamless user experiences across web and mobile platforms.
- Worked in tandem with back-end developers to integrate front-end code with server-side logic and databases, contributing to full-stack development projects.
- Implemented responsive design techniques to optimize web pages for various screen sizes and devices, enhancing accessibility and user engagement.
- Conducted comprehensive testing and debugging of front-end code to identify and resolve issues, ensuring high-quality deliverables.
- Documented code and development processes to facilitate knowledge sharing and future maintenance, ensuring project scalability and continuity.
- Identified and implemented performance optimizations to enhance the loading times and overall performance of web applications, improving user satisfaction and retention.
